

Daniel Glover

Ruby on Rails full-stack developer

(801)900-7862 | gloversdaniel@gmail.com | [linkedin.com/in/danieltheglover](https://www.linkedin.com/in/danieltheglover) | github.com/glovemasterflex

Education

Certified Full-Stack Ruby on Rails
DevPoint Labs

02/16 - 05/16

At DPL, we are immersed into an 11 week, nine-to-five full-stack ruby on rails development environment. We are taken through the languages and technologies necessary to run a full-stack web development process and how each and every part works together to created an intuitive web application experience. Perhaps most importantly, we learn how to learn computer programming languages and initiate that part of our brains to be expandable and fluid with the ever-changing market.

Languages and technologies covered are listed to side.

Work History

Junior Developer
InfinityELS

05/2016 - Present

- Worked on brand new enterprise software suite in C# MVC w/ Razor Syntax
- Developed the demo site used for sales presentations

Skills

HTML/CSS

Understand HTML, embedded ruby, Haml, CSS, Less CSS, and libraries: materialize, font-awesome, bootstrap.

Ruby on Rails

Can run the entire MVC system, manage table associations, create concise controllers and models, develop routes, debug, and work with gems to maximize ease-of-use.

JavaScript

Familiar with: ES6 (big fan), CoffeeScript, AJAX, ReactJS, MaterializeJS, JQuery.

ASP.NET MVC w/ Razor

Beginner, but am familiar with MVC, as it is how Rails is modeled.
